

OCI Cost Report

Tenancy: OCI | Compartment: All

Period: 23 Mar 2026 → 07 Apr 2026 | 15-day window | 16 instance(s)

Boot volumes: 0 | Block volumes: 0 | Object storage buckets: 0

Run ID: golden-test

Instance Cost Breakdown

No instance data available for this reporting period.

Storage Costs

No volume inventory data available for this reporting period.

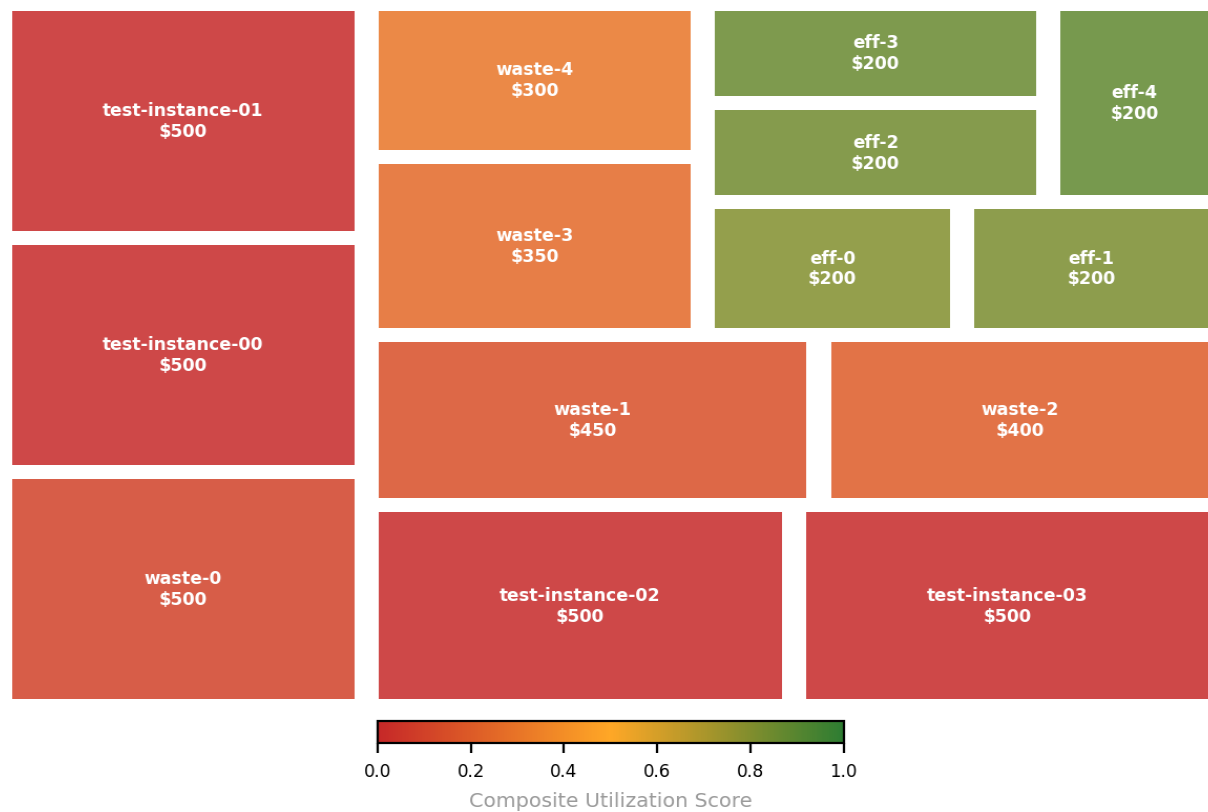

Object Storage Costs

No object storage (bucket) data collected for this reporting period. Ensure the OCI Object Storage collector is enabled in config.yaml.

Cost Analysis

Cost Distribution by Instance

Cost Distribution by Instance

Area ∝ monthly cost | Color: red = under-utilized, green = well-utilized

Each rectangle represents one instance. Area = monthly cost. Color: red = under-utilized, green = well-utilized.

Utilisation vs. Cost Analysis

Per-instance cost data not yet available for this period.

Cost Optimisation Recommendations

Potential monthly savings: \$1,000 | 4 downsize opportunity(s) | 0 instance(s) to review for downsizing

Downsize to Save — 4 instance(s)

test-instance-00	Current 4 OCPU / 60 GB Recommended 2 OCPU / 32 GB	Estimated saving if downsized \$250/mo (50.0% saving)	Rationale Instance 0 is consistently below 20% CPU utilization.
test-instance-01	Current 4 OCPU / 60 GB Recommended 2 OCPU / 32 GB	Estimated saving if downsized \$250/mo (50.0% saving)	Rationale Instance 1 is consistently below 20% CPU utilization.
test-instance-02	Current 4 OCPU / 60 GB Recommended 2 OCPU / 32 GB	Estimated saving if downsized \$250/mo (50.0% saving)	Rationale Instance 2 is consistently below 20% CPU utilization.
test-instance-03	Current 4 OCPU / 60 GB Recommended 2 OCPU / 32 GB	Estimated saving if downsized \$250/mo (50.0% saving)	Rationale Instance 3 is consistently below 20% CPU utilization.
